

Today, the desktop is also a battlefield.

The enemy is hackers, viruses, spyware, and theft. Protecting the data on your desktops can be a challenge. Linux thin clients from Wyse can help.

With Wyse® thin clients there is no local data storage, so the issue of securing a hard drive isn't an issue. And since Wyse is the leader in thin solutions, you'll manage your desktop environment supporting Linux, Java, HTML, and Windows applications from a central location—greatly reducing pressure on your IT staff, increasing productivity, lowering costs, and keeping your business that much safer.

Give your data 360-degree protection from internal and external threats. Win the battle with Wyse.

Secure, manageable, and low cost computing power should be the backbone of every successful operation. The solution? Wyse. Learn more at www.wyse.com/linux.
